Champion Meat Market

Scottish Concert Wed. January 22

A Scottish concert is advertised for Wednesday, Jan. 22, to take place in the Community Hall, Champion, under auspices of the Ladies' Aid. The program will be a particularly attractive one, and while Scotch in character may be relied upon to please everyone, regardless of nationality. A humorous sketch entitled "The Pie in the Oven," will be a feature of the program and a strong cast has been secured for its presentation.

It is to be hoped there will be a general turnout for this occasion. While the program is made up of local talent largely, arrangements include a piper and other attractions from outside points, so there will be sufficient variety to the bill of fare to please the most fastidious taste. The admission has been placed at 50c for adults and 25c for children under 12 years, and this modest price should prove a further attraction.

Weather Cold For Carnival

Despite the bitterly cold weather there was quite a turnout to the carnival on Wednesday evening and some very creditable costumes were in evidence. The prize winners were as follows:

Best Fancy Dressed Girl—Barbara Dow.
3rd—Orie—Ruth Jopling.
Fancy Dressed Boy—Alex Laiff.
Best Comic—Jack Collins.
Boys Races 8 and under—Walter Anderson, Sunny Moffatt.
Boys Race 12 and under—Gordon Berger, Geo. Hargraves.
Boys Races 13 to 15—Don Campbell, Alex Laiff.
Girls Races 12 and under—Miss (Gito, Ethel Gardiner.
Girls Races 15 and under—Ruth Anderson, Myrtle Hopkins.

Exhibition Game Well Contested

Champion and Granum hockey teams played an exhibition game here on Saturday night which ended in a score of four goals all. It was one of the best games seen here this season and delighted the spectators. Granum has a nicely balanced team, but the locals, with the assistance of Palmer of Carmanagay kept them going. A return match with this team has been arranged for an early date.

The school meeting on Saturday last was only sparsely attended. P. Holm and E. Fleming were re-elected trustees for their respective districts. It is a matter of regret that wider interest in the annual meeting is not shown by ratepayers.

Curling has been proceeding under forced draft at times, two draws being put on frequently despite the very cold weather. The four ladies' rinks are mostly responsible for the sport which will not likely last long.

The Champion team have as yet failed to register a win in the hockey league this season, the other teams being too strong for them. They are improving rapidly, however, and should be heard from before the close of the season.

Women's Institute Starts New Year

The Champion Women's Institute met on Tuesday Jan. 14th at the home of Mrs. U.S. Alexander, with 15 members and one visitor present in spite of the severe cold which froze the district director's little fingers and the president's classic nose, however Mrs. Bastin gave us an excellent inaugural address and as Mrs. Ulrich was not able to attend and give her promised "History of Champion," Mrs. Alcock ably substituted with a paper from England on how thanksgiving is kept in U.S.A.

Mrs. H. Smith was chosen for publicity secretary for the institute. Mrs. Baubler was appointed honorary president, and Mrs. Wise takes her place on the board of directors.

A card party is being arranged for the present month, a course in first aid and home nursing, also a baby clinic for later on.

The program for the year was discussed and a large number of reports, including the auditor, read.

Lunch was served by Mesdames Wise and Alexander, assisted by Misses Thelma Ash and Barbara Wise. A very piquant note was introduced at this point when the smoke pipe of the furnace fell down and turned it into a "Smoker." However Mrs. Stephenson demonstrated her talent as a plumber (or what do you call folks who put up pipes?) and calmly put them together again.

The next meeting will be at the home of Mrs. (Rev.) Hunt. Mrs. Miffin will give an address on "Rural Health Units."

Messrs. Solloway and Mills have been released on bail, an eight day adjournment being granted. The legal staff engaged both for prosecution and defence is imposing.

B. M. Roberts and Jack Kulpas played a curling game recently to decide who was the poorest curler in Champion and Jack acquired the distinction by a considerable margin.

The Local Bonspiel From the Poet's View

We are indebted to "Champion Chronicle" for the following description of the local bonspiel which will interest Chronicle readers:

You will all agree, I know with me
That the game that makes sport real
Is when your neighbors give up their labor
And attend the localspiel.

The Fireguard Swedes came thru the weeds
And won the first three sets
But the unlucky four saw their victory
O'er.

And fire saw their regrets.
Take and Put like Jeff and Mutt
Where either short or long
And when a rock they threw to block
They were sure to throw too strong.

In looking o'er the final score
You will note a Scot has won it
And his manly walk and Gaelic talk
Proclaim that he has done it.

Jock true to name, in the Scottish game
Is an adept with the broom.
His opponents weep, to see him sweep
As his feet play a Scottish tune.

He piles up a score, one, two, three, four
In the first four ends of the game.
This is bound to get, the enemy wet
Discouraged, dismayed and lame.

It may be wrong, but we are for it strong
We would like again to curl
Just to pay in our dollar and hear
Someone holler.

Sweep it o'er the leg, you, Chat.
Sweep it o'er the leg, you, Chat.

NOTES AND COMMENT.

The cold weather continues almost unbroken by warm waves. While there has been plenty of colder weather in other years than has been experienced this year, it is rarely of such long duration. There has also been almost continuous cloudy weather which would incline a newcomer to believe that "Sunny Alberta" is a complete misnomer.

The present business situation would lead to the belief that investments in speculative stocks were much larger than had been realized. While nearly everyone dabbled more or less in oil, particularly, there was no reason to believe that investments in this direction were very extensive, but there is no denying the fact that to judge from the amount of business being done it would appear there is very little surplus money available.

From many quarters comes the urge to sow the best seed available. Naturally registered seed is the best, but where this is considered too expensive it is often possible to secure the product of registered seed. Under any circumstances the best seed that it is possible to secure will pay for any extra expense involved in securing it.

Developments in the case against Calgary stock brokers will be watched with great interest. So widely are the stock markets patronized throughout this province that anything concerning the firms handling the business, be it to their credit or otherwise, is of out standing interest.

Both the Dominion parliament and the local legislature will be in session shortly. The return of the natural resources to Alberta is one of the big items in which this province is interested, which should be completed at this session of parliament and legislature.

The belief seems to be gaining ground that reduction in naval armaments is nearing realization. Just how far this will go is hard to estimate as many different views enter into the situation.

Many people are of the opinion that a hard winter holds promise of a good season following. In that case we are in for a bumper crop in 1930.

Sow Best Seed You Can Get

When the purchaser is not prepared to pay the comparatively small difference in price between registered seed and ordinary seed, it is sometimes possible to locate seed that traces back to registered seed. When this is done, however,

there is entirely no guarantee regarding the purity and quality in general of this stock, but it is often the case that this seed may be better than ordinary seed. By purchasing registered seed in Canada, one need have no fear as to its reliability, both as regards truthfulness to variety and quality in general. It is never safe to invest money in seed upon which a crop is dependent without a certain guarantee that the variety is recognized as being adopted to the locality and that the seeds are viable and comparatively free from impurities. High quality seed can therefore be purchased either from the growers or from reliable seedsmen in Canada, who usually carry large stocks of this seed representing the standard varieties recognized by the Canadian Seed Growers' Association. — Experimental Farms Note.

When looking over a department of the interior automobile road map of Canada and

the United States for 1929, we find that the progressive town of Travers has been unfortunately omitted, but as we are not on the map, we expect in the course of a few weeks to be on the air. Carl Stevens has got together full equipment for a broadcasting station and as soon as he receives the necessary license, and, etc., from Ottawa. You will not only be able to read the Travers news through these columns but also hear from Travers over the air. —Lethbridge Herald.

DUQUESNE & VANBESIER

Farmers Of Western Canada View With Hopefulness The Coming Of The New Year

As 1920 starts, the western farmer is sitting tight—and hoping. He is sitting tight because he realizes that he will receive between \$150,000,000 and \$200,000,000 less for his wheat crop than he did for the bumper yield of 1919. He is hoping because the future gives him reason—and because the farmer is by nature an optimist.

In resigning himself to the adverse situation arising out of the fractional-yield-reduced crop, the agrarian is lining up beside the businessmen in the cities. Side by side, the rural west and the urban west are striving to make the best of conditions. When business generally slowed up last fall, unemployment on the prairies swelled from a negligible figure until it reached the highest mark in half a dozen years. But the provinces, civic organizations and individual companies joined in a concerted effort to add the jobs. Every possible position in the face of existing conditions is being pushed forward to provide employment.

While the wheat pool is still jockeying for position with regard to price for the 1920 yield, the farmer has an eye on the possibilities for next year. He is unusually dry summer, and an autumn with barely adequate precipitation have left the soil's deficit in moisture. Undoubtedly, however, numerous spring rains will bring a good 1920 yield—and, of course, the farmer is hoping that worst conditions make the coming harvest worth a good price.

Ninety-two million, at its close, brought a mile to the west where a considerable portion of the 1920 yield is still in store. Official reports at Christmas time from the Argentine indicated that the southern republic's wheat output will be far below the average private estimate. To the west pool members—and that is to 60 per cent of the prairie wheat producers—development in the Argentine appears as strong support of the pool's policy of "watchful waiting" until prices are what they consider fair.

In the interval between crop-times, agrarian attention is occupied to a marked extent by provincial conventions of farmers' bodies. Some 50,000 active members are directly concerned in Manitoba, Saskatchewan and Alberta sessions—all three being held early this year. Probably 1,500 deleterials will attend these annual meetings, presenting the resolutions approved by various districts in the bid to mould a general farm program.

The past year has been one of approval for farmers' demands.

During 1920, the flow of immigrants from Europe's non-preferred countries was restricted to 30 per cent of the previous year's total and a complete reorganization was effected in the board of grain commissioners. Both these changes were requested at all three provincial meetings early in 1920.

Besides, the western farmer approves strongly of the decision to list "Canada" as a nationality on census sheets and of Canada's signature of the League of Nations optional clause.

Ahead, the farmer sees the opening of the Hudson Bay Railway to Churchill and of the cheaper water transport overseas. He sees improved conditions through the extension of telephone, light and power lines. He sees better roads and lighter taxes. He dreams of that bigger crop in 1920, and thinks of the chances of cashing in fairly well on the half size 1920 yield.

At the present there is the winter's work to do, and the resolutions to complete for the annual conventions. So the farmer in the west philosophically forgives the past and, to a great extent, the world's work has brought into the present. He sits tight and he hopes.

"Fiosale has a difficult part in this play." "That she is cast for a non-speaking part." "Yes, very difficult for a woman."—Rien Humer, Madrid.

W. N. O. 1820

A Famous Pecan Tree

Farmer in Texas Has Fine Income From Its Production

Spoken of as the father of pecan trees, the Jumbo Hollis tree, situated upon the farm of J. W. Morris, near San Sabo, Texas, holds the record of all nut trees in the matter of income from its production. For many years its annual crop of pecan nuts has sold for \$500 to \$1,000.

In a single season it produced a crop that sold for \$1,000. It is believed to be the largest pecan tree in Texas. Its towering branches cover an enormous area, and there have been but few years when they have not been loaded down with nuts of the thin-shelled, large variety.

The nuts from this tree always bring fancy prices. In addition to the small fortune which the tree has brought its owner from the sale of its annual crop of nuts, it has provided thousands of jobs for building other pecan trees throughout the section. Many of the budding trees are producing big yields of nuts of the same variety as the Jumbo Hollis' parent tree. The famous tree is situated on the banks of the Colorado River, and its age dates back for more than one thousand years, according to tree experts.

The Dual Purpose Cow

Many Farmers Find These Cattle Are Very Profitable

Some have questioned the existence of such an animal as the dual purpose cow. However, the fact remains that many thousands of good beef conformation produce sufficient milk to return a profit to their owners aside from the value of their calves which make good feeders. These qualities constitute dual purpose stock, and by reason of such qualities many farmers prefer this strain of Shorthorn to any other class of cattle. No intelligent breeder of such stock pretends to compete with the dairy breeds in average production of milk per head, nor as a rule does he pretend to compete with the straight bred heifers in the show ring, but he is a strong contender for highest position as measured by net returns at the end of the year, writes E. Van N. Co. Dominion Experimental Station, Scott, Sask.

The dual purpose cow at the Dominion Experimental Station, Scott, Sask., was started in 1921 with no outstanding producers, continued Mr. Van N. Co. During the eight succeeding years two cows have made records approximately 8,000 pounds; six cows have over 6,000 pounds to their credit, and eleven have made records of over 5,000 pounds. The herd has been inspected by a great many visitors and no person has denied the suitability of these animals for both milking and breeding lists, on the continuous basis of the year. With records referred to over many years under forcing. During the winter months the milk mixture used consisted of 100 pounds of chop, 100 pounds of hay, and 100 pounds of cake meal. From six to ten pounds of this mixture was fed per head, per day, supplemented with prairie hay and alfalfa. When on pasture in summer, a light feed of chop was fed as follows: 300 pounds brown, 300 pounds chop, 150 pounds barley, chop and 200 pounds of cake meal.

Would Welcome Change

Obligations Of Average Wage Earner Are Hardly Fair

Dr. Hugh S. Cummings, surgeon-general of the Public Health Service at Washington, recently stated that while the pauper race has the benefits of modern medicine free of charge and the millionaire pays dearly for them, the man of ordinary means, who will not accept charity and cannot afford fees, is being neglected.

This opinion depicts a situation obtaining in Canada as well. As a rule, indigents suffering from physical afflictions are cared for in hospitals and the financial burden is borne by the public body, while the person of ordinary means is required to foot his own bill and the indigent's as well in an indirect way.

The ultimate burden really rests with the average wage earner. He would no doubt welcome any change that would alleviate his unfair obligations.

Building Down

Japan has proposed building a skyscraper "backwards" or constructing it as far below ground as those of America rise into the sky. One completed will be 90 floors deep, having a steel framework and in the form of a huge cylinder, 155 feet in diameter, and 1,100 feet deep. It will cost \$12,500,000.

One-half of Alaska is as inhabitable as Norway. It could sustain a population of 10,000,000.

A ROYAL WEDDING

Children of six and seven years of parents of south and central Australia recently stood in wonder and awe, and felt, rain for the first time. A seven years' drought has been broken in the country by torrential rains, so heavy that the railway between Quorn and Alice Springs was destroyed and traffic suspended indefinitely.

Irrigation In Western Canada

One Million Acres Of Land Under Irrigation In Southern Alberta

Each year irrigation is assuming greater importance in the agricultural development of Southern Alberta. At the present time approximately one million acres of land in this part of Canada are capable of irrigation by one or other of several companies. The proper use of irrigation water is not yet a definitely settled question.

During the past few years the subject has been given special study by the assistant superintendent of the Dominion Experimental Station, at Lethbridge, Alberta. The results of these studies have been published in a bulletin No. 125, of the Department of Agriculture, at Ottawa. The investigations have covered the irrigation of wheat, alfalfa, potatoes, sugarbeets and sunflowers. The conclusions reached with respect to wheat and alfalfa are particularly interesting. Irrigation in the fall, after harvest, is the succeeding year's wheat crop was found to be a good practice. If the fall irrigation was not good, and if the precipitation of May and early June was not abnormally high, it was found essential to irrigate after the crop was up in the spring, but before the plants were checked in growth by lack of moisture.

With alfalfa, it was found in years of not more than normal rainfall, benefits were given the first two years to produce two good crops. One of these was applied in the fall, or in the spring, to give a heavy first cutting of hay. The second irrigation was required just before or just after cutting the first crop.

Moose Jaw Seed Grain Fair

Entries Of Grains and Grasses Were Received For Check At Three Weeks Of Age Over The Year Period Was As Follows: Raw River, 2.2, ordinary raw, 2.5, cod liver oil and raw, 2.5, bone meal, 2.6, and cod liver oil, 3.1. It will be observed that the feeding of cod liver oil gave the poorest results, and the raw river the best.

Despite the dryness of the season grains and grasses entered for the various contests were of a high quality and received the commendation of the judges. Farmers prominent in grain growing in the Moose Jaw district entered the best and in all the classes there was a total of 54 entries. In addition to the grains and grasses there were entered poultry and potato exhibits and classes for boys and girls. The judges were Dr. Harrington, University of Saskatchewan, who was assisted by J. C. Mitchell, Dohind.

Revolutionary Changes In Canada's Mining Industry May Result From Scientific Discovery

Supplementary Feeds

For Breeding Hens

Special Foods To Increase the Hatchability Of Eggs

It is being found out that the hatchability of eggs can be improved by feeding the laying hens with special foods in addition to the regular ration. At the Northern Ontario Experimental Station, of the Department of Agriculture, at Ottawa, such supplementary feeds as cod liver oil, raw liver, bone meal, and a mixture of the former two were fed. One hundred hens were divided into pens of ten birds each, making duplicate pens for each feed in test, as well as for the check pen which received the ordinary ration only.

The cod liver oil was fed at the rate of one-quarter teaspoonful per bird, per day, the raw liver, one half-ounce per bird, per day, and the bone meal was mixed in the dry mash at the rate of five per cent by weight. For the pens receiving both the cod liver oil and the raw liver, the quantity of each was reduced one-half. The experiment was divided into two periods. The first period in which the first period covered the regular mating season when male birds were kept in their respective pens, while the second period in which the male birds were mated daily. The first period covered 43 days, and the second period 26 days. Separate records were kept with each of the two periods.

This work was continued over three seasons. The average number of eggs required per chick at three weeks of age over the three year period was as follows: raw liver, 2.2, ordinary ration, 2.5, cod liver oil and raw, 2.5, bone meal, 2.6, and cod liver oil, 3.1. It will be observed that the feeding of cod liver oil gave the poorest results, and the raw river the best.

Discuss Empire Trade

Commercial Travellers Would Hold Empire Meeting In Toronto

Resolution favoring the holding of a convention of commercial travellers from all parts of the British Empire to discuss Empire trade was passed at the annual meeting of the Commercial Travellers' Association of Canada, held in Toronto.

The meeting would be held in Toronto at a date yet to be decided on. A. E. Colewell, president, in his address to the delegates, said conditions throughout Canada are sound and satisfactory, but it is recognized from the point of view of commercial travellers, the present situation is one which cannot be regarded with equal satisfaction.

Some of the very factors, he said, which are contributing to the volume and success of retail business in Canada are tending to retard growth of the association, judging in the light of membership, because of the overabundance of member of chain stores and amalgamations of wholesale houses.

Seed Oats

Saskatchewan Government Has Quantity On Hand For Distribution

The Saskatchewan Government is now in possession of 225,000 bushels of seed oats, all available for distribution through municipal officials and farmers' organizations, it is announced. The government is in a position to supply No. 1 oats for seed purposes at 10 cents a bushel, delivered, an additional two cents to be added to that price if the buyer asks for delivery in sacks.

A Back Number

Some Americans were discussing English humor. In order to prove an assertion that it was totally different to American, one of the party, observing an Englishman in the room, challenged a friend to go and tell him the funniest American story he knew and watch the result.

The friend took up the challenge and spun the Englishman an extra funny one. Nothing happened. Somewhat nettled, the American said:

"Maybe you'll laugh at it this time next year."

"No," said the Englishman, "I laughed at it this time last year."

Swift Current Fox Farm

J. A. Black, who established a silver back fox farm at Swift Current, in 1924, is shipping over \$25,000 worth of pelts to England. This is an average of \$175 to pelt for 125 pelts. Mr. Black started with twenty pair in 1924, and this year he has 150 choice silver back foxes left for future stock.

Revolutionary changes in Canada's mining industry within the next year are foreseen as the result of experiments being carried out by scientists in the Department of the Interior at Ottawa. Secret tests of two instruments promise fulfillment of the age-old dream of finding minerals with automatic devices.

One instrument, the Torsion balance, has been used primarily for measuring gravity. It has been found so delicate that it measures mineral deposits in its locality.

The other instrument is the seismograph, commonly employed for recording earthquake shocks. Experiments have shown that shocks travel through mineral deposits at a different speed than through rock; the seismograph is set up and a blast of dynamite is blasted in the neighborhood. A calculation of the speed of the recording apparatus indicates the nature of the intervening rock structure.

Even oil may be discovered with the seismograph, scientists believe. The method is being tried by oil and if the instrument fails to register the presence of petroleum may be suspected.

Employment of these modern equivalents of the ancient divining rods anticipate enormous development of Canada's great natural resources of wealth.

Forecast For This Year

Astronomer Looks For Lighter Rainfall and Short Crop

Lighter rainfall, reduced crops, better weather, less danger from forest fires, fewer electrical storms, increased fur production, these are some of the consequences expected in 1920 from a diminution in the strength of ultra-violet rays from the sun.

Dr. Ralph E. Delany, of the Dominion Observatory, a distinguished Canadian astronomer, looks for a lessening of the sun's ultra-violet rays for the next four or five years. While hesitating to make definite predictions on account of the vagaries of the sun's activity, he believes that a series

A New Year Message of Peace

Radio, as a great unifying force in the national life of Canada, was again demonstrated on the second day of this new year when speeches by Hon. W. L. Mackenzie King, Sir Robert Borden, and General Jan Christian Smuts, former Prime Minister of South Africa, were broadcast over the Dominion from the Atlantic to the Pacific, enabling tens of thousands of Canadians to clearly hear every word spoken.

The importance from a national standpoint of Canadians being able to listen to such speeches as those given by Premier Ramsay MacDonald, and General Smuts, can hardly be over-estimated. They not only serve to link Canada more closely to other governing units of the great British Commonwealth of Nations, but they likewise help our people to learn of Canada itself as it is seen and appreciated by world statesmen.

Many of the problems confronting South Africa in these early years of its autonomy as a self-governing Dominion, are similar to those which confronted young Canada and the Fathers of Confederation fifty and sixty years ago. In South Africa, as in Canada, they have problems relating to the racial origin of the two major groups in the Commonwealth and inherent in which is the problem of language. In addition, South Africa has the problem of the native black races which, fortunately, we are free of in this Dominion.

In his short address, Sir Robert Borden referred to the fact that Canada and South Africa, at the Peace Conference, appeared to have a clearer perception of the future of the Empire than did others of the Dominions. Borden did not labor the point, nor did he take time to explain just why this should be so. But it is not without reason that he made this statement at times, when from one cause or other, racial and language difficulties crop up, and dissonance is made of these differences and difficulties to inflame the passions and prejudices of people, the question is frequently asked in the English-speaking provinces: Why should Canada be obliged to recognize the French language, and continue certain old French laws, when Australia is not so bound?

The answer is not far to seek. Canada, like South Africa, is a conqueror country. It was originally a French possession, but was wrested by force of British arms from France, just as the Transvaal and the Orange Free State were wrested from the Boers. Australia, on the other hand, was colonized by English-speaking people. There was no conquest, except that over the native races. When France ceded Canada to Britain, and when the Boers laid down their arms in South Africa, treaties were negotiated between Britain on the one hand, and France and the old Boer Republics on the other. In those treaties Britain solemnly pledged her national word and honor to the observance of certain things, and among these was recognition of certain racial, religious and language rights and privileges.

Accorded full Dominion status, the duty and responsibility of maintaining and observing both the letter and the spirit of these treaty obligations devolves upon Canada and South Africa. The national word and honor of these two Dominions is pledged just as solemnly as is that of Great Britain itself. And if Great Britain, Canada, South Africa, and the whole Empire was prepared to go to war and make all the sacrifices entailed in the great world struggle with Germany in order to keep Britain's pledged word guaranteeing the neutrality and independence of Belgium, how much more should all portions of the Empire loyalty, faithfully, generously, fulfill those obligations which alone made Confederation possible in Canada, and has made South Africa a loyal unit in the Empire?

In his speech, General Smuts dwelt at length upon Canada's leadership in the Empire, and the great contributions which this Dominion has made in the cause of national unity, Empire unity and solidarity, and world understanding. It was Canada's example which made union in South Africa possible. It was the example of the British Empire which made the League of Nations possible—the League being, as General Smuts pointed out, but the exemplification and continuation of the same principle upon which the British Empire is founded and continues to exist and prosper.

Speaking of Canada, General Smuts used words which every Canadian should take to heart, and which, in concluding this article, we quote: "You have taken the lead in many respects. You took the lead in racial settlement. The Prime Minister has referred to the coincidence with our situation in South Africa. Our racial circumstances resemble your own. If we have reached a happy solution of our racial questions in South Africa, it is largely due to the precedent you have set. You found the first solution of the racial question and we have followed you, and the precedent you have set and which we are following. I hope will be followed more and more by other nations of the world so that the questions will cease to trouble the peace of the world and, instead of being a source of division, will become the bond of union between the nations of the earth."

A Consoling Thought

It was necessary for taxation purposes to decide which side of the Canadian and United States border a farm, which an old lady had just purchased, actually lay. Surveyors finally announced that the farm was just on the American side of the border. The old lady smiled with relief. "I'm so glad to know that," she said. "I've heard that winters in Canada are terribly severe."

Novel Wall Decoration

In a barber's shop in Islington, the walls and ceilings are completely covered with thousands of minute pieces of plate-glass mirror which the proprietor, Mr. Festa, has cut and painted in all colours of the rainbow and in all shapes from stars to roses. The largest piece of glass is less than an inch square, and the total number is about a quarter of a million.

A man with no aim in life is just as much handicapped as a dog with no tail to wag.

The bagpipe was used by ancient musicians in Egypt and Greece.

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess of food. It can be cured with an alkali. The best way, the quick, harmless and sure way, is to take a little of Magnesia. It has been recommended for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and all other food symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy remedy. It is the only one that is safe and sure.

Be sure to get the genuine Phillips' Magnesia. It is the only one that is safe and sure. It has been recommended for 50 years in correcting excess acid in the stomach. It is the only one that is safe and sure. It has been recommended for 50 years in correcting excess acid in the stomach. It is the only one that is safe and sure.

A DISTINGUISHED VISITOR

General Jan Christian Smuts, P.C., C.H., former Premier of the Union of South Africa, probably the most picturesque figure of the great war and the great peace that followed it, photographed in the Windsor Station of the Canadian Pacific Railway on New Year's Day. This was the first time in his long career that he had crossed the Atlantic to visit this continent and to fulfill his intention of "seeing something of Canada and Canadians at home and to get a living impression of the most important part of the young British Dominion."

While in Montreal he was admitted to an L.L.D. Degree by the University of McGill.

Cheap Phonograph Records

New Chemical Composition Will Make It Possible To Produce Records To Sell At 15 Cents

Phonograph records selling at 15 cents each and retailed like magazines at newspaper stands throughout the United States, will go on the market soon, as the result of the discovery of a new chemical composition known as durium, according to an announcement made by Dr. H. T. Evans, professor of chemistry at Columbia University.

A huge corporation, known as the Durium Products Corporation, already has been formed for the manufacture of records, the announcement said.

Discovery of the new composition was made after three years of experiment, according to Dr. Evans. Durium is liquid in its original form, he said, and is transformed by subjecting to heat into an insoluble, infusible solid, which combines hardness and flexibility to a remarkable degree.

Records made from durium are printed on a medium printing press. A disc of fibre paper is covered with the substance, which is a clear golden color, resembling amber.

Miller's Worm Powders attack worms in the stomach and intestines at once, and no worm can come in contact with them and live. They also correct the unhealthy conditions in the digestive organs that invite and encourage worms, setting up reactions that are most beneficial to the growth of the child. They have attacked their power in hundreds of cases and at all times are thoroughly trustworthy.

Would Take Some Fixing

The following letter was received at the office of a railway mail service company: "Dear Sir:—The evening papers have not been coming regularly. Today I got yesterday's paper, and when I got yesterday's paper to day, the next day I got the paper of the day before the day of the paper I got the day before. Last year I got the paper of the day before and never once was there a misce. Please fix it."

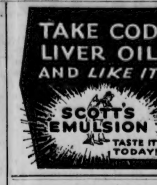

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother's Own Worm Expeller.

The Crown Colony of Hong Kong was ceded by China to Great Britain in January, 1841.

Visitors to the English Parliament average 5,000 on ordinary days, and more than 20,000 every Saturday.

That Shere Threat Needs Mindful.

Book Brings Good Price

First Edition Of Hawthorne's "Scarlet Letter" Worth Large Sum To buy a book for \$1 and two days later receive an offer of \$1200 for it was the good fortune of Mrs. Dorora Hood, of Toronto.

Recently Mrs. Hood purchased a group of old books and discovered among them a first edition of Nathaniel Hawthorne's "Scarlet Letter," printed at Boston in 1850. The book is quoted in booksellers' catalogues at prices ranging from \$1,000 to \$1,500. Besides "The Scarlet Letter," Mrs. Hood found a first edition of "Marble Faun" by the same author, printed in 1860, and valued at \$100.

WAS ALWAYS AILING NEVER FELT WELL

Health Restored Through the Use Of Dr. Williams' Pink Pills

"I am one of the many who have found new health through the use of Dr. Williams' Pink Pills," says Mrs. Everett Dowe, South Nelson, N.B. "For some years I never felt well, and at times was so weak that I would be confined to bed. At the time I was in an ailing condition and found it difficult at all times to do my work. I was subject to headaches, poor appetite, breathlessness at the least exertion, and very pale. Before Dr. Williams' Pink Pills were recommended to me I had lost all hope that I could be without any good results. I had become completely discouraged. I strongly urge every woman to take a trial. A friend strongly urged me to take Williams' Pink Pills, and finally I consented to do so, but with the hope that they would help where other medicines had failed. But in this, to my joy, I was mistaken. I had not been taking the pills very long when I knew they were helping me. I found my appetite improved, I slept better at night, my strength was gradually returning. I continued taking the pills for several months, when I again found myself a well woman, and I believe it not been for Dr. Williams' Pink Pills I would today be a helpless invalid. The place has since been taken by others in our family, with the same beneficial results. I strongly urge every woman to try this grand health-building medicine. If you will send your name and address to me, I will mail you a box free. You can get these pills through any mail order or medicine box from The Dr. Williams' Medicine Co., Brockville, Ont."

Madrid's Great Worry

Abandoned Donkeys Are Proving Problem For Spanish City

New York has the problem of disposing of abandoned automobiles, but in Madrid it's abandoned donkeys. Every once in a while a little donkey is found on the streets, either lost, or abandoned by an owner who could no longer afford to feed the animal.

The difference between an abandoned automobile and an abandoned donkey is that the automobile occupies space, but eats nothing, while the donkey does both. The City of Madrid spends quite a bit of money every time a donkey is found on its streets, and is therefore anxious to get rid of him as soon as possible. Auction sales are announced, but frequently no buyers are immediately found.

The Oil For the Athlete.—In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose. Old athletes who for years have been using it can testify to its value as a lubricant.

For the first 10 months of the present year Canada's total exports were \$1,004,635,233. In the corresponding period of 1928 exports totalled \$1,070,930,345. The decrease in grain and food exports are almost twice as much as the total decrease of all exports. The increase in manufactured goods largely offset the falling off in the grains.

Minard's Wards Off Grippe.

The United States ranks first among the countries exporting rayon hosiery to Egypt.

Safeguarding Life At Sea

Parliament Will Likely Deal With Problem At Next Session

Parliament at the forthcoming session will probably be asked to enact legislation putting into effect some of the provisions of the convention which resulted from the "safety of life at sea" conference. This was held last year and was attended by Alex. Johnson, deputy minister of marine. While the general provisions of the convention do not become effective until 1931, a number of them are considered of sufficient urgency to warrant their being adopted by the statutory governments at the earliest. This has particular bearing on radio apparatus. The convention agreed that henceforth ocean-going ships generally must carry wireless. It will be compulsory for passenger vessels and also for freighters of 1,600 tons and over. Each administration has discretion to exempt from this provision specified voyages where the administration is satisfied that these do not involve any hazard.

According to international agreement, a passenger ship is one which carries 12 passengers and over; it is realized that there are circumstances under which small vessels must be exempted from the convention without the removal of risk. Such ships would be exempt from the proposed legislation.

Hitherto one of the difficulties has been the equipping of freighters with radio apparatus. The cost of maintenance, involving, as it does, the payment of no fewer than three operators, is at times prohibitive. In order to meet this problem, however, the conference has devised an automatic system which reduces the number of freighter radio men to one. This invention makes it possible for a ship to receive an "O.D." in the form of a warning signal. The stricken vessel sends out its message in four second dashes, and this reaches the one-man radio equipped freighter by the ringing of a bell both in the signal-house and in the chartroom. Thus, if the operator is off duty, the officer on watch receives the warning signal, and immediately is able to communicate with the operator who has not thus proceeded to his post and take the message.

The conference developed other requirements for safeguarding life at sea, but it is believed that only those dealing with radio will be taken up in the Canadian parliament this next session.

Settling the West

538 Families Settled Permanently On Canadian Farms By Colonization Association

A total of 538 families were settled permanently on Canadian farms in the first eleven months of 1929 by the Canada Colonization Association, it was stated at Saskatoon the other day. The total does not include those families placed as workers for other farmers, and which, if added, would raise the total to 1,270 families. The area covered by the permanent placements this year is 13,241 acres.

Winds are produced by differences in atmospheric pressure in various locations.

Children's Colds Best Treated Externally

That's why modern mothers prefer Vicks—It cannot upset delicate stomachs. Rubbed on throat and chest, it acts two ways at once: (1) Its healing vapors, released by the body heat, are inhaled directly to the air passages; (2) It "draws out" the soreness like an old-fashioned poultice.

VICKS VAPORUB

OVER 15 MILLION JARS USED YEARLY

World's Richest Country

In Wealth Per Capita Switzerland Is No 1 in the World

The commonly accepted impression that the United States leads the world in per capita wealth is corrected by a table issued by a Wall Street journal. The United States stands in third place. Switzerland leads with a wealth per capita of \$5,136. New Zealand follows with \$3,029. The United States is third with \$2,908. Other important countries are far behind. Canada following the United States with \$2,779; Australia, \$2,710, and Great Britain, \$2,677. At the tail of the procession is Russia, whose wealth is estimated at but \$215 of the head of population. Wealth is based on capital and statistics show that a people with little wealth may still be prosperous, even though living costs are relatively high.

Don't Submit To Asthma. If you suffer without hope of breaking the chains which bind you do not put off another day the purchase of Dr. J. C. Kellogg's Remedy. A trial will drive away all doubt as to its efficiency. The sure relief that comes will convince you of more than anything that can be written. When help is so sure, why suffer? This matchless remedy is sold by dealers everywhere.

Alberta Oil

More than 200 wells have been drilled or are drilling in Alberta, and plans are under way for starting at least 50 more in the spring. Turner Valley accounts for 37 actual producers with an output of 100,000 barrels of crude naptha, per month, and 200,000,000 cubic feet of natural gas daily.

No. 47

Published in the interests of the People of Champion and Farmers of this vicinity.
GEO. L. DEPUÉ, Editor.

Need Storage Space?
All you have to do is to box up the under side of your stairs, then either take out the steps and insert a 12 inch drawer, or put hinges on the stair treads. If you do this you will have a long series of drawers, the whole series of boxes, the lids of which are your stair treads and the space in which will store a large quantity of material.

Archie Huggles has been under the weather for the past week, and as he says a little out of his head hence given by him elsewhere in this issue.

"Win Penn Motor Oil" Still the Best."

We are leaving no stone unturned to make our tractor-schools successful and B. W. will all be there will be several.

"Good Equipment Makes a Good Farmer Better."

Interesting topics discussed and several entertaining pictures are shown.

Glass, china and reputation are easily cracked, and never well mended. Or at any rate it has been our observation that reputation, like Lenin's china is "Good to the Last Drop."

Don McAnay has returned after his siege in Lethbridge hospital. Don't forget the tractor school on February 5th. Everyone invited.

This hint for mothers originally was passed along in an advertisement. When the baby is done drinking, it should be unscrewed and held in a glass or under the tap. If the baby does not thrive on fresh milk, it should be boiled.

Howard, John, Monty (with stars) Me, Hays tractor-schools success and B. W. will all be there will be several.

"Good Equipment Makes a Good Farmer Better."

Doc. Come along and get acquainted. Don't forget the date, Feb. 5.

Herbert Willies is reported on the mend although it will be a long siege.

Boarding House boarder: "I say, my dear fellow, I wouldn't eat any rice pudding if I were you. They had a wedding here yesterday."

The Old Timers' are going on their annual rampage on the 17th. Don't forget it.

Don't fail to read Archie Huggles' description of the local hospital. Keep Feb. 5th in your date as date of our Tractor School.

Women's Institute Report
Indicates Successful Year

The Institute has held all regular and two executive meetings.

During the year we had the privilege of hearing addresses on (1) History of Cannamangy; (2) a book review; (3) Agriculture; (4) Maternal Mortality; (5) Home Economics; (6) Institute Work; (7) Education; (8) Legislation; (9) Immigration; (10) Town Planning; (11) Beginning of Life.

Also there was an exhibition of "Things Made in Canada," when prizes were given, a social afternoon and an angel food demonstration.

Among other enterprises were dinners to come sick folks at Christmas, many flowers sent to the sick, magazines to three "shut-ins," four \$5 donations to worthy causes, \$250 to the little daughter of a member, help given with the banquet at the opening of the Community Hall and paid \$50 for blinds for the same hall. We had the town planner here, also the pure food expert and a public health lecturer. We sent representatives to the conventions at Medicine Hat, Edmonton, and Yukon. A flower show was arranged for and a good deal of work done about it which stimulated interest in horticulture, but it had to be given up on account of the continued dry weather. A very "wonderful" school clinic was held at which 130 of the pupils in our public school were examined and received treatment where necessary at reduced rates from the medical doctor, the dentist and the eye specialist. A baby clinic was held later in the year when 21 children of pre-school age were examined by the public health nurse assisted by one of our local nurses.

A car was decorated for the parade on the first of July and took a prize of \$10. An exhibit sent to Carmangay fair won a \$30 prize. A movement to have more music taught in the public school resulted successfully. We served lunch at the Old Timers' dance and served lunch at the Elks' dance. In addition we had the wonderful hope chest disposed of on December 27, for which so many charming and valuable things were given, and the reception when we entertained the husbands of all the members.
